### About Us

#### Our Story

Our firm was founded on a simple but enduring principle: disciplined investing, grounded in research and strengthened by rigorous risk management, creates sustainable long-term value. From inception, our vision has been to build an institutional platform capable of navigating complex and evolving market environments with consistency and clarity. What began as a focused investment initiative has grown into a diversified, multi-strategy platform supported by experienced professionals, structured governance, and robust infrastructure. We recognized early that performance alone is not enough enduring success requires process, accountability, and a culture that prioritizes collaboration over silos.

Over the years, we have invested deliberately in building systems that reinforce discipline at every level of decision-making. From portfolio construction and capital allocation to compliance and operational oversight, our framework is designed to protect investor capital while identifying asymmetric opportunities across global markets.

Our growth has been guided not by short-term trends, but by long-term conviction. We have assembled teams with deep sector expertise, encouraged cross-strategy dialogue to strengthen insight, and implemented technology-driven tools to enhance research and execution. This integrated approach allows us to operate with both agility and control, even during periods of heightened volatility.

Today, our platform reflects the values upon which it was built: integrity, precision, and partnership. We view ourselves not only as asset managers, but as long-term stewards of capital aligned with our investors and committed to delivering performance through discipline.

Our story continues to evolve, but our foundation remains constant: a relentless focus on process, risk awareness, and value creation across market cycles.

ABOUT OUR COMPANY

## Our Multi-Strategy Platform

Our diversified investment approach enables us to generate independent return streams while maintaining controlled risk exposure.

### Equities Long/Short

Our fundamental equity teams seek to generate alpha through deep bottom-up research and sector expertise. Portfolios are constructed within a robust risk framework, targeting controlled exposure to market and factor risks while concentrating capital in high-conviction ideas. Dedicated trading, research, and technology teams support execution efficiency and portfolio precision.

### Global Macro

Our macro platform pursues opportunities across interest rates, currencies, equities, and commodities worldwide. We deploy a balanced mix of: Directional strategies Relative value approaches Systematic models Risk oversight is integrated directly into portfolio construction, ensuring agility during volatile market conditions.

### Equities Arbitrage

We focus on event-driven and relative value opportunities within global equity markets. Through disciplined research, proactive risk management, and execution expertise, we aim to capture non-correlated return streams that complement our broader equities platform.

### Commodities

Our commodities teams invest across liquid, financially traded products globally. We combine sector expertise, data analytics, and macro insight to evaluate supply-demand dynamics and capitalize on pricing inefficiencies across energy, metals, and agricultural markets.

### Credit

Our credit strategy seeks absolute returns across the global credit spectrum, including corporate, structured, and event-driven opportunities. Portfolios are constructed to adapt across credit cycles, with a focus on downside protection and capital preservation.

### Growth Equity

We invest in high-growth private and late-stage businesses with strong competitive positioning and scalable models. Through active partnership and disciplined evaluation, we seek to unlock long-term value creation.
